

## Game Logic:

- Board Setup (10x10 grid, Randomly placed mines, amount specified by user, grid starts hidden with no flags, first click must be mine-free)
  - Claimed By: Aidan Prather
  - Estimated Time Needed: 1-2 hr.
  - Actual Completion Time: 1 hr
- Basic Gameplay (Uncover cells by clicking, reveal numbers around mine-free spaces, cells with no adjacent mines recursively uncover adjacent cells)
  - Claimed By: Aidan
  - Estimated Time Needed: 1-2hr
  - Actual Completion Time: <1 hr
- Mine Flagging (Places flags on covered cells to indicate mines, flagged cells cannot be uncovered or unflagged)
  - Claimed By: Aidan Prather
  - Estimated Time Needed: 1-2 hr
  - Actual Completion Time: <1 hr
- Win/Loss Conditions (Lose whenever a mine is clicked, win when there are no mines remaining)
  - Claimed By: Dillon Figueredo
  - Estimated Time Needed: 1 hr
  - Actual Completion Time: 2 hr

## UI/Input Handling:

- Display Grid (Show appropriate cell states [Covered, uncovered, flagged, adjacency count])
  - Claimed By: Warren Tan
  - Estimated Time Needed: 10m
  - Actual Completion Time: 5m
- Show remaining flag and mine count (Flags: Total mines minus placed flags, Mines: Total mines placed flags)
  - Claimed By: Warren Tan
  - Estimated Time Needed: 3m
  - Actual Completion Time: 3m
- Show Status (Playing, Victory, Lose)
  - Claimed By: Maxwell Phachanla
  - Estimated Time Needed: 10m
  - Actual Completion Time: 5m
- User Input (Right click to uncover cell, left click to place/remove flag)
  - Claimed By: Warren Tan
  - Estimated Time Needed: 10m
  - Actual Completion Time: 3m

## Documentation and Testing:

- Board is Correct (Correct number of mines, first click is safe, no flags)
  - Claimed By: Fabrizio Falcon
  - Estimated Time Needed: 5 min
  - Actual Completion Time: 5 min
- Game Logic is Correct (Mine adjacency number is accurate, flags work as intended, win/lose conditions trigger appropriately)
  - Claimed By: Fabrizio Falcon
  - Estimated Time Needed: 10 min
  - Actual Completion Time: 10 min
- UI/Event Handling is Accurate (Mine/Flag count is accurate, status is properly displayed, left-click and right-click functions are correct, user clicks are counted when necessary)
  - Claimed By: Fabrizio Falcon
  - Estimated Time Needed: 5 min
  - Actual Completion Time: 5 min
- Prologue Comments for Each File (Function/Class/Module name, description, inputs/outputs, sources are attributed, author(s), creation date)
  - Claimed By: Fabrizio Falcon
  - Estimated Time Needed: 10 min
  - Actual Completion Time: 12 min
- System Overview (High-level description and diagrams of system components, data flow, and key data structures)
  - Claimed By: Cyn Tran
  - Estimated Time Needed: 30 minutes
  - Actual Completion Time: 1h 40 minutes.

## **Activity Log**

### **9/11/2026**

- First group meeting (Aidan, Dillon, Fabrizio, Maxwell, Nathan, Warren) [1 Hour]
- Creation of tickets + activity log (Nathan) [1 Hour]

### **9/13/2026**

- Verify board/game logic code (Aidan) [<1 hr]

### **9/15/2026**

- Verify Input Handler code (Warren) [~3 hrs]

### **9/15/2026**

- Verify UI code (Maxwell) [~2 hrs]

### **9/16/2026**

- Test UI and game logic (Fabrizio)[< 1 hr]

### **9/17/2026**

- Verify win/loss conditions and write automated tests, found doc/code mismatches in the Input, Flagging, Status and HUD tickets; flagged for the team (Dillon) [2 hrs]
- Draft and complete the system architecture documentation (Cyn) [~1h40]

### **9/18/2026**

- Second team meeting (Aidan, Cyn, Dillon, Fabrizio, Maxwell, Nathan, Warren) [~30 min]

### **9/19/2026**

- Added README file, revised documentation, extended comments (Nathan) [2 hrs]
